

**Curricular Efficiency & Effectiveness
Board of Trustees Update
December, 2021**

BOT Resolution Related to the YSU Future State as it relates to Curricular Efficiency & Effectiveness (October 2021):

“.....in consideration of the 14th day Enrollment Report for Fall 2021.....this Board of Trustees expects the following:”

- Significant reductions in small class sections
- Numbers of course offerings are reduced to only the number essential for student progress and degree completion
- Percent of undergraduate student credit hours of instruction taught by full-time faculty is increased via steps including but not limited to reducing the amount of time faculty are released from instruction
- Substantially reduce part-time instruction
- Economic viability of maintaining all of the undergraduate and graduate level majors and degrees that currently exist is directly aligned with optimizing the academic portfolio and quality of instruction
- Thoroughly assess opportunities associated with offering additional online courses and programs and implementing as appropriate
