

2022 Noel Levitz Snapshot Series: **Advising & Goal Setting**

My academic advisor is knowledgeable about requirements in my major.

Undergrad Students, Age 18-24

■ Importance ■ Satisfaction

Undergrad Students, Age 25 & Older

■ Importance ■ Satisfaction

Graduate Students, All Ages

■ Importance ■ Satisfaction

Students were asked how important an item is on a scale of 1-7, with 7 being the most important. Students are then asked how satisfied they are with that item on a scale of 1-7, with 7 being the most satisfied. The gap is the difference between importance and satisfaction.

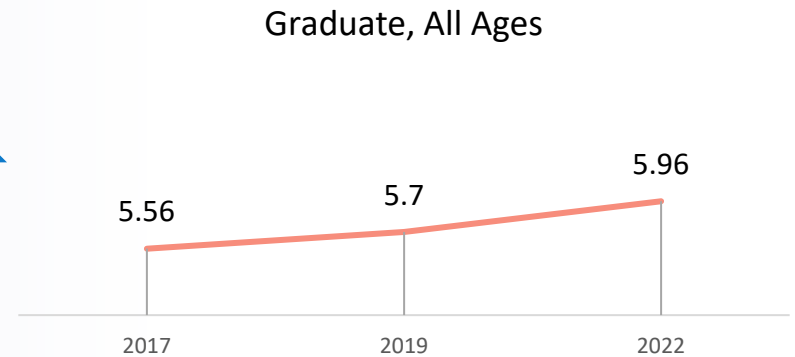

In the spring of 2022, the Institute for Teaching & Learning fielded the Noel Levitz Satisfaction survey to all YSU students. Two different survey versions were used as a part of the survey administration. Many of the same items occur on both surveys, and this document focuses on both survey versions, but breaks up results by undergraduate/graduate status and age group. The surveys had a **response rate of 17%**.

More than ever, Undergraduate students want an advisor that is **INTERESTED IN THEIR SUCCESS.**

Graduate students are increasingly satisfied with the item, "When students enroll at this institution, they **develop a plan to complete their degree.**"

My experience at YSU is preparing me for a career.
