

Bachelor of Science in Dental Hygiene

Dental hygienists work in a variety of settings to deliver clinical care and work under varying levels of supervision. Common services included in the dental hygiene **scope of practice** are patient assessment, radiographs, prophylaxis, and fluoride treatments. Each state passes its own laws determining the specific services that dental hygienists can perform, the settings in which they can practice and the level of supervision under which they practice. A dental hygienist must have strong academic capability, good manual dexterity, and solid critical thinking skills.

The Bachelor of Science in Dental Hygiene (BSDH) at YSU is a four-year program. Students take nine semesters of coursework, including three semesters of basic science and general education before admission into the program.

At the conclusion of the program, students are eligible to take regional and national board examinations. Upon successful completion of these examinations, graduates may apply for licensure to practice dental hygiene in the state of Ohio, as well as many other states.

Employment Opportunities

Dental hygienists can be employed in general dental offices or in offices that specialize in pediatric dentistry (treatment of children) or periodontics (diseases of the soft tissue and bone). Students who have completed a bachelor's degree are prepared for opportunities in marketing, dental sales, research, teaching, dental public health, state or federal government positions and other health care settings.

Faculty

YSU maintains a faculty to student ratio of approximately 1:4 in the dental hygiene clinic; 1:5 in the radiology and local anesthesia labs as well as the expanded functions lab and clinic; 1:10 in head and neck anatomy, and dental materials, and 1:24 in the classroom. These ratios enable the faculty to provide individual instruction to the students.

The dental hygiene faculty includes full-time and part-time dental hygienists, dentists, and dental specialists.

Accreditation

The Dr. Madeleine Haggerty Dental Hygiene Program is accredited by the American Dental Association Commission on Dental Accreditation.

Facilities

The Dr. Dominic A. and Helen M. Bitonte College of Health and Human Services located in Cushwa Hall is home to the Dental Hygiene Program. Cushwa Hall houses classrooms, conference rooms, dental hygiene clinics, and a patient reception room.

Off Campus Experiences

Experience in nontraditional sites is required in the public health dental hygiene course. Students provide oral health care to patients in regional dental clinics and dental health education in the area school systems.

Special Costs

Dental hygiene students incur costs above the university tuition, such as uniforms, an instrument kit, magnification glasses, and the hepatitis vaccine. There are also fees for state, regional, and national licensure examinations.

Application Information for the Bachelor of Science in Dental Hygiene

New, transfer and former YSU students must first apply and be admitted to the University by completing the undergraduate admissions form and indicating dental hygiene as the intended major. The application must be submitted by August 1 for fall semester or December 1 for spring semester. The academic credentials of transfer students must be received by August 15 for fall semester and December 15 for spring semester.

www.ysu.edu

The application deadline for the Bachelor of Science in Dental Hygiene degree is September 15 for spring semester admittance. Application packets are available in the Dean's office, Bitonte College of Health and Human Services, Cushwa Hall, room 2104.

All necessary dental hygiene records and supporting documents must be received by September 15 of the year of application. Students will be admitted on a competitive basis as class size is restricted.

Observation Requirement

Prospective students must complete a minimum of 12 hours of observation of a registered dental hygienist in at least two separate dental offices or dental clinics. Observation forms are available on the dental hygiene website at www.ysu.edu. Each prospective student must complete the forms and mail them to Youngstown State University Dental Hygiene Program, One University Plaza, Youngstown, Ohio, 44555. The forms must be received by the September 15 deadline.

Curriculum Overview

First Year

Writing 1
 Chemistry for the Allied Health Sciences
 Allied Health Anatomy and Physiology
 Introduction to the Bitonte College of
 Health and Human Services
 Writing 2
 Communication Foundations
 Microbiology for the Health Professions
 Microbiology Laboratory for Health Professions
 Or
 Microbiology for Health Care Laboratory
 General Psychology
 Quantitative Reasoning
 Or
 Statistical Literacy and Critical Reasoning

Second Year

Introduction to Professional Ethics
 Introduction to Sociology
 Arts and Humanities Elective
 Social and Personal Awareness Elective
 Dental Hygiene 1
 Clinical Dental Hygiene 1
 Head and Neck Anatomy
 Head and Neck Anatomy Lab
 Management of Medical /Dental Emergencies
 Social & Personal Awareness Elective

Summer

Dental Hygiene 2
 Clinical Dental Hygiene 2
 Oral Histology

Third Year

Dental Hygiene 3
 Clinical Dental Hygiene 3
 Oral Pathology
 Dental Radiology
 Dental Radiology Lab
 Periodontology
 Health Education for Allied Health*
 Dental Hygiene 4
 Clinical Dental Hygiene 4
 Pharmacology
 Local Anesthesia & Pain Control for Dental Hygienists
 Local Anesthesia & Pain Control Clinic
 Research Methods*

Fourth Year

Dental Hygiene 5
 Clinical Dental Hygiene 5
 Dental Materials
 Dental Materials Lab
 Directed Dental Hygiene Research
 Expanded Functions for the Dental Hygienist
 Expanded Functions for the Dental Hygienist Lab
 Dental Hygiene 6
 Clinical Dental Hygiene 6
 Dental Public Health
 Community Clinicals
 Ethics and Practice Concepts
 Expanded Functions Clinical

Program Goals

- GOAL 1: Participate in a variety of recruitment activities to attract and admit qualified students.
- GOAL 2: Review and evaluate program curriculum to include current research and evidence based content.
- GOAL 3: Enhance the competency and professionalism of the dental hygiene faculty by encouraging scholarly activity and service.
- GOAL 4: Graduate students who have met stated program competencies.

Transferability

Transferability of courses completed in the YSU Dental Hygiene Program is dependent upon the policies of the new program of application.

*AHLT distance education courses are assessed a technology fee and use a secure login and pass code to verify and protect student identity.
