RE: Expansion of Jump Start summer program

Jump Start was initiated by President Tressel. Jump Start offers incoming freshmen the opportunity to be admitted for the summer term, and take up to six credits from a delimited menu of courses at the substantially reduced tuition rate of \$500 per 3-credit course. The original intention was to increase Fall yield, help students reduce debt, and help them graduate in 4 years. On average, 70 students have participated during each of the last 3 years.

Jump Start students are successful. Retention and persistence data shows Summer to Fall and Fall to Fall retention rates commensurate with or slightly better than, those of other incoming freshmen students who take summer classes. The average summer Jump Start GPA is 3.3, and the subsequent Fall GPA is 2.9, on average. In addition, the opportunity has been attractive to under-represented and under-resourced students, with 36% from minority groups, 38% first generation, and 25% Pell eligible, on average. It is too early to evaluate persistence towards and time to degree and debt reduction. A major component of the program is to increase student readiness to be successful in a new and very different educational environment.

Beginning Summer 2018, we propose to improve Jump Start by increasing the number of credits students may take from six to nine. This will accommodate the addition of STEM courses, which are 4 and 5 credits, due to content and rigor, and/or lab requirements. It is desirable to offer STEM classes during summer because of the large numbers of STEM majors all needing similar sets of classes. The additional seats during summer will relieve some of the Fall enrollment pressure and help more students achieve sophomore stratus after their first year at YSU.

Another improvement is the request that all out-of-state students be charged the Affordable Tuition Advantage surcharge, regardless of their residence. This, along with additional discounted tuition rates to compensate for the higher number of credits, makes the program more attractive, and easier to understand and navigate.

The increase in the allowable credit hours, expanded course offerings, and attractive tuition savings do not alter the original intent of Jump Start, but rather improve its appeal and reach. We intend to continue to build Jump Start over time with additional student success programming that will support student access to a university education. We will continually assess student success during and following their Jump Start experience so we can improve the program in an on-going basis.

#### Quarterly Update on FY 2018 Operating Budget

The fiscal year *Budget to Actual Report* presented on the following page is a summary analysis of year-to-date actuals compared to budgets in standard account categories. This report displays financial information for the University's general fund and is summarized in a "dashboard" format using color-coded business indicators as follows:

On targetCautionWarning

This report is for the first two fiscal quarters of FY 2018 that encompasses the six-month period of July 1 through December 31, 2017.

Year-to-date, revenues are tracking on target as planned, as denoted by the green business indicator assigned to most income categories. Revenues from tuition and mandatory fees, however, are tracking below budget as a result of FTE enrollment growth being +0.4%, below the 2% growth upon which the budget is based. But overall revenues are on target as a result of above-budget income in other categories, namely investment income and other student fees. Compared to the prior fiscal year, total revenues at December 31<sup>st</sup> were approximately \$3.6 million or 3.0% greater.

Expenses are on target in most categories, with wages and benefits tracking similarly to the prior fiscal year, notwithstanding the provisions of the new OEA Faculty agreement that were implemented in October. Expenses for scholarships, however, are significantly above budgeted levels and above the previous year's expenses at December 31<sup>st</sup>. Management is analyzing scholarship spending, and will review procedures for making scholarship awards and setting scholarship budgets.
