Interest rates are fixed for federal loans, but private loans may have either fixed or variable rates.

## Defining Capitalized Interest

Interest capitalization occurs when unpaid interest is added to the principal amount of a student loan.

Private Refinance Vs. Federal Consolidation

Private Refinance

Combine **private** and federal payments into one payment

Possibly **lower interest rate** and/or payments

Interest is based on your (or your co-signer’s) creditworthiness with **choice** of fixed or variable rate

Current interest rates and/or loan term can **lower** the overall cost of the loan

Pays off existing loans and may reflect a **lower monthly payment** on your credit report

You should **compare rates** and terms and apply with the lender of your choice

Federal Consolidation

Combine **federal** payments into one payment

Possibly **lower monthly payment** with longer loan term

The interest rate is the **weighted average of included loans**, rounded up to the nearest 1/8th of a percent

You will **pay more interest** over the life of the loan if the repayment period is extended

You **may lose** some benefits offered with the original loan
