

**Keith Logan**

**STEM Coordinator of Internships, Careers, and Co-ops**

**Youngstown State University**

Keith Logan is a dedicated and innovative professional focused on bridging the gap between STEM education and career readiness. As the STEM Coordinator of Internships, Careers, and Co-ops at Youngstown State University, Keith connects students with experiential learning opportunities that prepare them to thrive in today's fast-paced, technology-driven world.

Mr. Keith Logan holds a Master's degree in Computing and Information Systems and dual Bachelor's degrees in Telecommunications and Sociology, all from Youngstown State University. This interdisciplinary foundation allows Keith to combine technical expertise with a strong understanding of communication and societal dynamics—an approach that helps students navigate both academic and professional environments with confidence.

Keith's career spans a variety of roles in education, technology, and student development, including Academic Advisor, Classroom Instructor, and Director of Media Operations. He also contributed to diversity and inclusion initiatives as a Graduate Assistant in YSU's Equal Opportunity and Diversity Programs.

A passionate advocate for artificial intelligence and emerging technologies, Keith actively integrates these innovations into his work with students. He believes that AI, digital media, and cutting-edge tools are transforming industries and creating new opportunities for talent. His mission is to help students harness these technologies to expand their skills, spark creativity, and pursue meaningful, future-ready careers.
